

Team/Group	Study : Proto		
Date:	2020-Oct-14th	Time:	10:30-11:00
Minutes prepared by:	Study : Proto	Location:	Online(teams)
1. Purpose of the meeting			
<ul style="list-style-type: none"> • Discussing additions and changes to the current version of the application • Discussing the website looks 			
2. Attendance			
<ul style="list-style-type: none"> • Florin Deleanu (o) • Kwangjin Lee (o) • Emilian Alexandru(o) • Evaldas Drasutis (o) • Frank F.P.H. de Lepper(o) 			
3. Agenda			
Topic	Discussion		
Feedback:	<ul style="list-style-type: none"> • The current user interface is too chaotic. It would benefit from the following changes: doing only one thing on a screen, having automatic events, a better alignment for the buttons and user inputs and displaying data similarly to a spreadsheet inside all listboxes. • Managing the employees schedules screen needs to have an overview by department and the possibility to see if the employees are available to be scheduled based on the days they work and shift availability. Additionally the user needs to be able to see the employees work hours and days. (An employee need to work an X amount of hours per week, contract hours) • Adding graphs to statistics for comparing working hours with contract hours. • The products need to have a name in addition to the model and the id should have 13 digits. The product category will be replaced with department. • The sales representative screen could make use of the product id when selecting a product for a request. • The color pallet should include purple and the website deadline is at the end of these two weeks.
