Client Questions

1. We are one of the teams that are going to develop the new system.We understood from the previous interview that you need a new administrative system so that you can manage the employees and the stock. You mentioned that these are the main priorities , is there anything else you would like to add as a priority?

2. During the previous interview you mentioned that there is more information to add regarding the employee data. What employee information needs to known?

3. How much of the employee information will be revealed for further modifications on the website and how much in the app for the administration?

4. If an employee accesses their profile, what info can they see and change themselves, and what can an administrator change about them

5. Based on what criteria do you want to be able to find information about specific employees?

6. Can you describe the process of restocking the shelves?

7. Is it suitable for you that we will make an app supported on Windows?

8. For the attendance of the employees, do you need them to check in and out everytime they come to work or just trust the established schedule?

9. You talked about the assignment of the work shifts. We were thinking about looking at the 3 available schedules and seeing what employees are in each one. Is that a good approach or do you have something different in mind?

10. You mentioned which workers need to see specific information. Does that mean different types of employees are only allowed to see the specific data they need?

11. Is the website going to be used by all employees or just one department?

12. Do you want the application to request an order product automatically when it reaches its minimum stock in the depot?

13. What kind of information will be collected regarding stock data?

14. Can you tell us more about how you want the interface of the app to look like? And the same for the website. Please give us a general idea but also some specific points.

15. How do you envision the log-in information for your employees? Is there a specific stand that you would like us to follow?

16. What kind of statistics would you like to see? Can you walk us through them in detail?
17. What department will be checking for the schedule and attendance? // What u think ? HR
18. What times are the working hours ?

Meeting-14/10/2020:

19. During the previous presentation you mentioned that our application could benefit from a user interface overhaul. We will show you how the app functions in its current state. Could you give us a general idea of what you envisioned so we can start improving on it?
20. Considering how the app looks, what would you change about it?(color, different looking buttons, bolded/colored text etc.)
21. Would you change any of the information shown in the list boxes?
22. Regarding the website, which color combinations would you like us to use?
23. Given our current version of the app, what else would you like us to add?

Deliverable is normally documented with regard to the project.
