Meeting Minutes

Week 2 Meeting

Team Members: Kwangjin Lee, Evaldas Drasutis, Emilian Alexandru, Florin Deleanu
Tutor: Stan S. van Hartingsveldt
Date: 09/09/2020
Time: 14:00-14:30PM

1.0 New Actions

-Tutor provides a better visual representation of the hardware, and explanation for the product handling. The depo worker is the person who manages the stock, he/she would add, remove, edit, accept and deliver products.

-Our view on the sales representative and the requests to the depo workers is incorrect.

-The system should be like a ticket system. The sales representative sends requests tickets and confirms the arrival of the requested products, where as the depo worker marks the requested ticket as processed or in progress

-Moscow table/plan is not aligned with the functional requirements

-Tutor provides a better view on the ranks hierarchy inside the company.

Changes to agreement with client:

-The application is build for windows

-Rewrite:

1. website agreements
2. statistics agreements

Functional requirements:

1. The user should be able to dismiss an employee providing a reason, however the GDPR requires the ID system to permanently remove the employee. The best scenario is for the option the be present but it should also be harder to access
2. Administration should be able to also change employee data

-Rewrite sales, hr and depo (FR) based on the informations depicted from the figures

Use cases:

-should be rewritten based on the new view on the company hierarchy

2.0 Schedule Review

3.1 Planned Work

Duration: 2 weeks

1. Improvements on the URS
2. GUI creation
3. Wireframe updates
4. Website development
5. Application UML diagrams
6. Application development
7. Database development
